

INFO RHINO CAPABILITIES AND STATUS 2022

solutions@inforhino.co.uk

INFO RHINO

Traditionally a software consultancy on-site in Business Intelligence, Application Development, mainly in the financial services sector. We repurposed effort on building a data platform for the property sector. This has led to new products and services, including the capability to deliver white-label platforms.

WEB DATA PLATFORM

Info Rhino has developed a website capable of accepting data and content to automatically display in charts, tables, galleries, and article libraries on-site. This dramatically saves time by reducing the amount of time needed to publish content to the website. This product is being offered as a white-label solution to clients.

SOFTWARE PRODUCTS AND UTILITIES

Multiple software applications have been developed ranging from data processing, data calculation, reporting, release management, and workload automation.

OWN WHITE LABEL DATA PLATFORMS

Our Web Data Platform is to power multiple websites which are intended to be spawned off into new platforms.

FINDIGL – PROPERTY PLATFORM

Collecting data from different sources, it is intended to provide users with enhanced views of the market not available on traditional platforms. We intended to start putting data into www.findigl.com early 2022 and seek investment following a relaunch. We have a Business Model Canvas with clear monetisation mapped out.

CRYPTO STATTO – CRYPTOCURRENCY ANALYSIS PLATFORM

Crypto Statto will present metrics on cryptocurrency prices, volumes on-site, in ways not available for most novice to intermediate market participants. The website will focus on; Trade Signals, Market Dashboards, Articles and Content. Starting 2022.
